Climate Risk Database

"The catalyst for resilient urban development in Tanzania"

Search from the available dataset

128 Layers **12 Maps** **239 Community**

Exposure | Risk | Hazard | Vulnerability | Early warning

Resilience Academy's Climate Risk Database (CRD) is a digital geospatial data repository that supports research, education, and disaster-risk management practices. It contains a rich archive of data sets that can be accessed publicly via the Resilience Academy Geonode hosted at the University of Turku Geonode.
